

Cool Careers for Girls Series

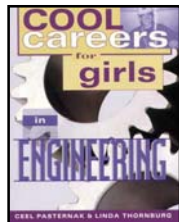

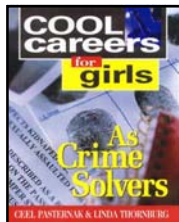

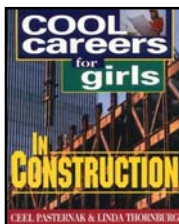

Ceel Pasternak and Linda Thornburg

**Young girls have career dreams...
Meet 144 women with really cool careers!**

Written especially for girls ages 11 through 15, this popular series takes a fun and fascinating look at exciting non-traditional careers for women. Filled with inviting graphics and photos, each book profiles 10-11 women who love their work. These women are like many girls today – they had dreams but didn't always know what they wanted to be when they grew up. As they tell their stories, they provide girls with good role models and excellent advice for investigating a variety of interesting career alternatives. The upbeat and informative pages provide answers to important questions relevant to young girls who are still in the process of exploring educational and career alternatives. Books in this series encourage career exploration and broaden girls' career horizons. Each book includes vital information about the types of jobs available; scholastic requirements; a personality checklist for each job; salary information; contacts for scholarships, mentoring opportunities, apprenticeships, and internship programs; and lists of books and videos for more information. 1999-2004. 128-164 pages each. Hardback editions.
