These finds demonstrate that modern humans were living at the southern end and probably elsewhere in the African continent at a period considerably earlier than comparable fossils are recorded in other parts of the world. Border Cave is a very large solution cavern overlooking a spectacular drop into Swaziland. The site also preserves a rich, mainly Late Pleistocene mammal fauna, representative of the Florisian Land Mammal Age in southern Africa. Florisbad and two other spring sites are in process of being nominated as national heritage sites. Similar deposits have been found at Haua Fteah in Libya, in the Omo Valley in Ethiopia, Mumbwa in Tanzania and Mumba in Zambia.
