Teaching aids and materials support the lesson plan and assist learning. They use the senses of hearing (through audio tapes, CDs) and sight (through visual aids such as handouts, worksheets/books, overhead transparencies, videotapes and PowerPoint). Research indicates that whilst only about 12% of what we learn comes from hearing, 75% comes from what we see. A well designed aid should promote perception and understanding, reinforce the spoken word, aid memory retention through repetition, motivate and arouse interest. Visual aids should be simple, to the point, related to the lesson plan, in Teachers Planner is an effective alternate week planning aid suitable for all teaching professionals, whether you are working a 5 or 7 day week with extra curricular activities Teachers Planner for iPad makes time-table planning and maintenance far easier and faster than traditional methods. 8- PlanBook Touch. Planbook is lesson planning software for educators. Enter the courses you teach and the type of schedule you use and you'll be planning in no time at all. 9- Teacher's App Box.
