Peter Pericles Trifonas - 2000 - Rowman & Littlefield Publishers.details. In this compelling and timely treatise, cultural theorist and educator Peter Trifonas puts forth the first book-length study of Jacques Derrida's 'educational texts:' that is, those writings most explicitly concerned with the ethics and politics of the historico-philosophical structures constituting the scene of teaching.Â This book takes as a premise that Derrida is a profound educational thinker, who from the very beginning concerned himself with questions of pedagogy. Peter Pericles Trifonas is a professor at the Ontario Institute for Studies in Education/University of Toronto. His areas of interest include ethics, philosophy of education, cultural studies, literacy, and technology.Â The remarkable logic of autism: Developing and describing an embedded curriculum based in semiotic phenomenology. Sport Ethics and Philosophy 2 (2): 234256. Connolly, M., and T. Craig. Jacques Derrida, Peter Pericles Trifonas. This new book reflects Derrida's latest views on the role of education and international organizations in an era of globalization. In this book, Derrida develops a notion of the global citizen that is uniquely post-Kantian.
