The feasibility study addresses the two factors that are critical to the success of any venture: supply (production) and demand (marketing). A feasibility study should be the first step in planning a new enterprise. It is an essential first step before spending money and time on more detailed plans. What are the current trends in consumption? How is the product or service being consumed? (Packaging, volumes) What is the quality of the product that is being consumed? Prices: Setting a price is a critical activity in the market portion of the study. The price must be high enough to cover all costs and provide you a profit, but low enough that customers will purchase the product or service. To help determine the price, should be looked at Feasibility studies are useful either when starting a new venture or when identifying a new opportunity for an existing business, such as a new product or service. These include: prices, market size, market segmentation and problem analysis of the sellers as well as total demand, degree of competition, estimation of quantity and quality to be supplied, availability, distribution and sales for profit. On a final note, if you cannot prepare a feasibility study on your own, just like you can hire a Doctor, a Lawyer, an Engineer and an Architect to assist you handle a particular situation; you can also hire a professional to help out in preparing a feasibility study.
