Naseem Javed

For the last few decades, Naseem has circumnavigated the globe and made his mark as a name identity expert. Born in Delhi, raised in Karachi, he has spent the last 40 years living in Canada. Thirty

years ago, Naseem founded ABC Namebank International based in Toronto and New York. This small specialized consultancy on corporate nomenclature and brand architecture offers thought leadership and provides answers on how these names directly impact the success and failure of organizations on the global scenes. Naseem has also authored an influential book, *Naming for Power*, delivered some

100 keynotes, and written hundreds of articles. Naseem directs corporate teams in this naming process; he has personally created names for his clients that when combined pull tens of billions of dollars in annual revenues; he is recognized as a world authority on global naming and corporate nomenclature issues. Naseem stays active and up to date on the latest ICANN policies, which in coming years will completely turn the global cyber-name-branding and domain name scene completely upside down.

A great speaker and a moderator, he opens the way for dynamic debate on the future of image and identity of corporations and where exactly they are headed; his talents are correctly spotting global naming trends, noting how they suddenly attack on existing powerful brands. Naseem is an award-winning graphic designer. He worked as marketing consultant on the 1976 Montreal Summer Olympics. Today, he works exclusively on global corporate nomenclature issues, leaving designing work to other brilliant agencies. Unless he is on a podium, somewhere around the world, Naseem is at his home just outside of Toronto, where he lives with his wife Lucie and son Tashi.

• Charles Darwin, *On the Origin of Species*. 2 likes. Like. • Charles Darwin, *On the Origin of Species*. 2 likes. Like. • Why is *The Origin of Species* such a great book? First of all, because it convincingly demonstrates the fact of evolution: it provides a vast and well-chosen body of evidence showing that existing animals and plants cannot have been separately created in their present forms, but must have evolved from earlier forms by slow transformation. • Charles Darwin, *The Origin of Species*. 1 likes. Like. • When man is the agent in introducing into a country a new species this relation is often broken: • Charles Darwin, *A Naturalist's Voyage Round the World: The Voyage of the Beagle*. 1 likes. Like. *The Voyage of the Beagle* is the title most commonly given to the book written by Charles Darwin and published in 1839 as his *Journal and Remarks*, bringing him considerable fame and respect. This was the third volume of *The Narrative of the Voyages of H.M. Ships Adventure and Beagle*, the other volumes of which were written or edited by the commanders of the ships. *Journal and Remarks* covers Darwin's part in the second survey expedition of the ship *HMS Beagle*. Due to the popularity of Darwin's account Jared Diamond. W. W. Norton & Company New York London. More praise for *Guns, Germs, and Steel*. "No scientist brings more experience from the laboratory and field, none thinks more deeply about social issues or addresses them with greater clarity, than Jared Diamond as illustrated by *Guns, Germs, and Steel*. In this remarkably readable book he shows how history and biology can enrich one another to produce a deeper understanding of the human condition." • Edward O. Wilson, Pellegrino University Professor, Harvard University. • Library of Congress Cataloging-in-Publication Data Diamond, Jared M. *Guns, germs, and steel: the fates of human societies* / Jared Diamond, p. cm. Includes bibliographical references and index. ISBN 0-393-31755-2 1. Social evolution.
