It is called an "Item Reference Number." This number is not assigned by GS1- it is up to the manufacturer to assign the unique Item Reference Number for a given product. The last number is a check digit calculated from the previous 11 digits. The common laser barcode scanner reads codes by reflecting light from the black and white lines of a barcode and since the laser is a single line it only reads horizontally across the barcode. An imager takes a picture of the barcode and analyzes this to decode the information. A barcode (also spelled bar code) is a method of representing data in a visual, machine-readable form. Initially, barcodes represented data by varying the widths and spacings of parallel lines. These barcodes, now commonly referred to as linear or one-dimensional (1D), can be scanned by special optical scanners, called barcode readers. Later, two-dimensional (2D) variants were developed, using rectangles, dots, hexagons and other geometric patterns, called matrix codes or 2D barcodes, although they do Author TITLE PUB CALL NUMBER LAN Abdoerachman raden ajoe Dasar-dasar ekonomi sosialis Indonesia / oleh Hasan Amin. ..
