

SEMESTER AT SEA COURSE SYLLABUS

Voyage: Spring 2014

Discipline: Music

MUSI 2570: Music Cultures: Breaking Sound Barriers

Faculty: Professor Ingrid Bianca Byerly

Field Lab: Vietnam Day 1. Ho Chi Minh City, 14 February

COURSE DESCRIPTION:

This course explores how musical protest influences revolutions through complex and confrontational times. Discord creates both physical and metaphorical walls between societies, and music serves to effectively ‘break sound barriers’ between people. Using global case studies of musical initiatives in troubled times, we investigate how music mobilizes change, as both mirror and mediator, in political turmoils and revolutionary transitions.

The condition of the world around us perplexes us. And so it should. It is complex and confrontational, filled with debate and discord. This course will explore how the ‘musical markers’ of groups reveal both trends and ideologies in societies, and especially how they are capable of instigating powerful change in times of dynamic social and political crisis. We can all attest to how our lives contain soundtracks of influential music pieces, marking the unforgettable events of our unique experiences. So, too, societies have collective soundtracks that form and reflect their combined experiences, defining their unique histories. Music, then, serves as both voice and memory for individuals and societies, and it offers a soundscape through which to listen to and understand people, groups and their history. People have disagreed about both the causes of, and solutions to social conflicts and calamities across time. How did feuding groups arrive at catastrophic conflicts, and how do they resolve them? How can humans change political chaos to social order, and replace conflict with peace? Using global case studies of musical initiatives, and protest musicians, we will investigate, from an anthropological perspective, how music serves as both mirror and mediator in political turmoils and revolutionary transitions. Our central model – or anatomy – of a successful music revolution will be the South African transition from Apartheid to Democracy. From there, we will investigate the variations of that theme in other protest initiatives in the geographical spaces we encounter on our voyage. We will discover, through ethnomusicological analysis and models of conflict revolution, how music ‘sounds society’, and how, in turn, societies can be examined through music. Music will be revealed as an expression of both identity and ideology, and as a weapon of war and peace. The sheer volume and variability of composers and compositions make music a timeless and unparalleled site for creative individuals to explore visions of peace and democracy, and express outrage at violence and suppression. We will analyze how individual motives create public performances that serve social interests and mobilize change in societies undergoing political crises or social revolutions.

COURSE OBJECTIVES:

- Gain an understanding of the use and significance of the study of ethnomusicology.
- Gain a perception of the methods and motives of music in cultures.
- Foster an appreciation for the ways in which music reflects history.
- Cultivate an appreciation for the social complexity of music in society.
- Gain an insight into the transformative power of music in a politically charged environment.
- Become familiar with both the overlapping and contrasting techniques which differentiate, fuse or influence genres across ideological groups within a society.
- Gain an appreciation for the numerous and ingenious skills musicians use to both reflect and create their political ideologies through sound.
- Gain a solid understanding of the musician's role in the fostering of nationalism and democracy in societies in flux.
- Consider the revolutionary elements in music that have been used to outwit censors in oppressive regimes.
- Become acquainted with the political 'soundscapes' of countries that will be visited during the course of our travels.
- Become well acquainted with the impact of 'revolution' on each of the cities we visit during the course of our travels.
- Develop critical writing and thinking skills through written assignments based a range of primary and secondary sources.
- In port, students investigate where, when, and why music occurs, with particular attention to the role music plays in mobilizing social change.

FIELD WORK

- Every student will keep a **FIELD JOURNAL** in which reflections and analyses of music that they are exposed to (in both class and ports) are recorded. The purpose of the field journal is twofold: 1)

to encourage students to discover as many music forms and genres as possible as they travel, so as to familiarize themselves with the styles and ‘soundscapes; of various cultures, and 2) to become versed in how to verbalize in discussions about music. Expressing the attributes and components of music in words is an art in itself, and this exercise allows for better fluency when engaged in ‘speaking music.’

- In addition, each student will *interview two musicians in any port*, to discover not only their personal history, but also their musical history. Interviewing techniques will be part of the preparation for these events.
- Every student is required to participate in a full-day Field Lab in one of the ports. During this venture, students will keep thorough notes of all aspects of the experience: 1) people, 2) places, 3) musical performance, 4) cultural relevance and 5) personal reflections.

FIELD LAB : Day 1 in Vietnam: 14 February
HoChi Minh City, Vietnam

Breaking Sound Barriers students will have the privilege of the Vietnamese musical culture in a unique and transformational way. First, they will visit the renowned SOUL music academy: the heart of youth music education in Ho Chi Minh City. Following a tour of the campus and some introductions and lectures by staff, including the potential observation of music classes in session, students may also have the unique experience of viewing the Voice Kids of Vietnam – the famed chorus of which Mr. Thank Bui of the SOUL Academy has been affiliated as a coach. Following that, students will travel by bus to Saigon’s historic Opera House, where they will be treated to the new and intensely dramatic AO Performance, which is receiving rave reviews internationally. The stunning scenography, in mostly black and based around the cultural significance of bamboo, is the backdrop to non-stop dance, juggling and acrobatics in the style of Cirque de Soleil. The show describes the cultural transformation of modern Vietnamese society through music and movement; using traditional instruments to accompany performers from backgrounds as varied as martial arts masters to street-style dancers. Substantiating the theme of the connection between culture, music and dance, students will experience first-hand the complexity of Vietnamese performance culture in particular – and global music and culture in general.

FIELD ASSIGNMENTS

- Students will write a five-page assignment dealing with each of the topics recorded during their field lab. This will comprise a single page per topic on each aspect of the fieldnotes taken: 1) people, 2) places, 3) performance, 4) cultural relevance) and 5) personal reflections.

Please note: Both the field journal and the Field assignment will be handed in simultaneously.

(Be advised then, that your music field journal should be apart from your personal journal – not intersperse with it- so that all sections will be available for your professor to access and read).

METHODS OF EVALUATION / GRADING RUBRIC

Each student be graded on the following aspects of the course:

(Details of amounts subject to change)

- **Class Participation : Readings and Reflections (100 points)**
- **2 multiple choice quizzes (50x2)**
(Recognizing musical pieces, styles, and instrumentation dealt with in class, and available for listening and analyzing on the MV Explorer intranet).
- **Field Journal (recording their musical observations in ports and interview with musician/s) (100 points)**
- **Field Lab (participation and 5-part paper) (100 points)**
- **Final reflections (100 points)**

The total number of your points (out of 500) will be divided by five to determine your percentage.

HONOR CODE

Semester at Sea students enroll in an academic program administered by the University of Virginia, and thus bind themselves to the University's honor code. The code prohibits all acts of lying, cheating, and stealing. Please consult the Voyager's Handbook for further explanation of what constitutes an honor offense.

Each written assignment for this course must be pledged by the student as follows: "On my honor as a student, I pledge that I have neither given nor received aid on this assignment." The pledge must be signed, or, in the case of an electronic file, signed "[signed]."
