The discovery of this strange substance deserves a Nobel Prize. But, for Rubin, none has come, although she has long been a "people's choice" and predicted winner. Rubin has continued to champion women's rights to "and rights within" astronomy. "She frequently would see the list of speakers [at a conference]," says Bahcall, "and if there were very few or no women speakers, she would contact [the organizers] and tell them they have a problem and need to fix it." CATEGORIZED UNDER: Astronomy, Cool stuff. MORE ABOUT: Astronomy for Kids podcast. Repost: Carl Sagan Day. By Phil Plait | November 9, 2012 9:30 am. Astronomers are discovering a lot of planets these days. The official count is 800+, with thousands of more candidates (unconfirmed but suspiciously planet-like). Right now we give them alphabet soup names. Astronomy is the cool, sexy field of the scientific world. Sure, biologists and chemists are out there curing diseases or whatever, but they're just so. Meanwhile, astronomers are busy showing us sweet pictures of distant planets and playing around with telescopes the size of buildings. How can you compete with that? You can't, so here are the ten most important things astronomers throughout the ages have discovered: 10. The Movement of the Stars and Planets. The Discovery.

This glossary of astronomy terms contains definitions for some of the most common words used in astronomy, cosmology, astrophysics, and space exploration.Â Glossary of Astronomy Terms. The universe is a large place full of wondrous and unimaginable things. The amateur astronomy hobby contains words, labels, and technical terms that may seem be a little confusing for both beginners and the more experienced hobbyists. This famous astronomer carved herself a well-deserved place in history, so why doesn't the Nobel committee see it that way?Â Rubin has continued to champion women's rights to "and rights within " astronomy. "She frequently would see the list of speakers [at a conference], says Bahcall, "and if there were very few or no women speakers, she would contact [the organizers] and tell them they have a problem and need to fix it." But, as Rubin told science writer Ann Finkbeiner for Astronomy in 2000, she is "getting fed up. . . .
